

### **Conflict Minerals Statement**

BelleFlex Technologies, LLC is committed to the highest standards of ethical business conduct and compliance with applicable laws and regulations. As part of this commitment, we support efforts to ensure that minerals used in our products do not contribute to human rights abuses or environmental degradation, particularly in regions affected by armed conflict, such as the Democratic Republic of Congo (DRC) and its neighboring countries.

In accordance with the Dodd-Frank Wall Street Reform and Consumer Protection Act (Section 1502), BelleFlex Technologies, LLC takes steps to ensure that the tin, tungsten, tantalum, and gold (3TG) in our products, if any, are sourced responsibly. We require our suppliers to disclose whether these minerals originate from conflict-free sources, and we work closely with them to promote transparency and traceability in the supply chain.

We conduct due diligence on our supply chain to identify the source of 3TG minerals used in our products. We are committed to working with suppliers who are dedicated to ensuring that their minerals are not financing armed conflict or human rights violations.

BelleFlex Technologies, LLC does not knowingly source conflict minerals from mines or smelters that support or finance violence in conflict regions. We are dedicated to continually improving our processes and collaborating with our suppliers to support conflict-free sourcing and to contribute to positive change in the regions where these minerals are mined.

We will continue to monitor and assess our supply chain and strive to ensure that our sourcing practices align with our corporate values of integrity, respect, and accountability.
